Education

Colorado School of Mines PhD Statistics, GPA: 4.0	(in progress)
Colorado School of Mines M.S. Statistics, GPA: 4.0	2021
Colorado School of Mines B.S. Engineering Physics, GPA: 3.99 (<i>summa cum laude</i>) Minor: Computational and Applied Mathematics	2019

Research Projects

Monitoring Methane Emissions from Oil and Gas Operations <i>Colorado School of Mines, Department of Applied Mathematics and Statistics</i> <i>Colorado School of Mines, Payne Institute for Public Policy</i> <i>Advisors: Dr. Dorit Hammerling, Dr. Morgan Bazilian</i> <ul style="list-style-type: none">· Working on a variety of projects broadly seeking to more completely and accurately monitor methane emissions from the oil and gas industry.· Developed a framework for emission detection and localization using continuous monitoring data.· Created an empirical Bayesian hierarchical model to estimate daily methane fields on a very fine grid with uncertainty using coarsely “pixelated” satellite observations.· Performed an exploratory analysis of satellite methane data in the DJ Basin, Colorado.· Results from this work have been summarized in a number of non-refereed papers and conference talks.	Apr 2020 - Present
Modeling Atmospheric Carbon Monoxide <i>Colorado School of Mines, Department of Applied Mathematics and Statistics</i> <i>National Center for Atmospheric Research, Atmospheric Chemistry Observations & Modeling</i> <i>Advisors: Dr. Dorit Hammerling, Dr. Rebecca Buchholz</i> <ul style="list-style-type: none">· Used lagged multiple linear regression to model atmospheric carbon monoxide from climate indices.· Implemented a regularization method that preserves hierarchical model structure between main effects and interaction effects.· Created a framework to highlight the optimally performing models over a range of complexities.· Used cross-validation to quantify stability of selected model terms, aiding model interpretability.· A manuscript summarizing this work is currently in prep.	Aug 2019 - Present
Verifying Elve Simulation using Data Set of Observed Elves <i>Colorado School of Mines, Department of Physics</i> <i>Advisor: Dr. Lawrence Wiencke</i> <ul style="list-style-type: none">· Used elves, a class of transient luminous events that occur in the ionosphere, to study lighting.· Analyzed a large elve dataset using ROOT, a data analysis framework written in C++.· Determined the sensitivity of an elve simulation by mapping the input and output parameter spaces.· Used this sensitivity study to simulate observed elves and analyze differences between simulation and data, ultimately finding that simulation matches elve shape but not amplitude.· Presented my work at the American Physical Society (APS) April conference.	Aug 2018 - May 2019

Implementing Astrometry Based Laser System

Jan 2018 - Dec 2018

Colorado School of Mines, Department of Physics

Advisor: Dr. Lawrence Wiencke

- Implemented a laser system that gives the pointing direction of a laser from a photo of the stars.
- Used an astrometric software to determine equatorial coordinates of a picture of the stars.
- Created a coordinate conversion algorithm in MATLAB to convert from equatorial coordinates to horizontal coordinates centered on the laser system.
- Determined the relationship between azimuth angle and steps of the laser system stepper motor.

Planning Laser Field Campaigns for EUSO Overflight

Oct 2016 - Jun 2017

Colorado School of Mines, Department of Physics

Advisor: Dr. Lawrence Wiencke

- Planned laser field campaigns to test the Extreme Universe Space Observatory (EUSO), which was going to be sent to the ISS.
- Calculated the ground velocity of the ISS and used JSatTrack to plot ground tracks.
- Developed an orbital model for the ISS using Mathematica and JSatTrack that predicts the time and location of passes and takes into account the lunar cycle.

Characterizing Biorefinery Lignin

Jun 2016 - Aug 2016

Washington State University, Voiland School of Bioengineering and Chemical Engineering

Advisor: Dr. Ruoshui Ma

- Summer Research Experience for Undergraduates (REU) at Washington State University.
- Studied the chemical conversion of lignins into aviation biofuel.
- Used thermal gravimetric analysis and Fourier-transform infrared spectroscopy to find differences in characteristics between lignin samples.
- Presented at poster symposium: "Characterization of Molecular Structure and Interlinkage Network for Seven Representative Biorefinery Lignin"

Industry Experience

Systems Engineering Intern

May 2019 - Aug 2019

Northrop Grumman, Colorado Springs

- Worked with the Infrared Hardbody Signatures Team within the Threat Modeling Center (TMC).
- Investigated ways of increasing efficiency of the TMC's production process.
- Created a Python tool to interpolate temperature data, eliminating need for manual calculations and increasing simulation fidelity.
- Performed a sensitivity study on my temperature tool, finding that the error is negligible.
- Wrote Python scripts to automate documentation process, eliminating need to manually produce tables and re-type documents.

Systems Engineering Intern

May 2018 - Aug 2018

Northrop Grumman, Colorado Springs

- Worked with the Infrared Hardbody Signatures Team within the Threat Modeling Center (TMC).
- Investigated ways of decreasing simulation run time within the TMC's production process.
- Completed investigations into reflectance and false lines of sight, reducing run time by up to 80%.
- Wrote MATLAB scripts for parsing, plotting, and analysis of infrared signature data.
- Collaborated with other interns to implement a MATLAB and Unix based script that predicts the sunlit status of target objects.

Presentations

Invited Talks

1. Lyra Wang, **William S. Daniels**, Dorit M. Hammerling, Matthew Harrison, Kaylyn Burmaster, Fiji C. George, Arvind P. Ravikumar. “Multi-scale methane measurements at oil and gas facilities reveal necessary framework for improved emissions accounting.” *Stanford - Methane Emissions Technology Alliance (META)*, (2022).
2. **William S. Daniels**, Meng Jia, Amber Rexwinkle, Dorit M. Hammerling. “Leveraging multiple continuous monitoring sensors for emission identification and localization on oil and gas facilities.” *Colorado School of Mines - Applied Mathematics and Statistics (AMS) Graduate Student Colloquium*, (2022).

3. **William S. Daniels**. “Building intuition around common statistical learning techniques.” *University of Colorado Boulder - Quantitative Exploration and Discussion (QED) Supergroup*, (2022).
4. **William S. Daniels**, Dorit M. Hammerling, Rebecca R. Buchholz, Helen M. Worden, Fatimah Ahamad. “Using climate mode indices to forecast carbon monoxide variability in fire-prone Southern Hemisphere regions.” *International Global Atmospheric Chemistry (IGAC) Scientific Conference - MANGO Session*, (2021).
5. Dorit M. Hammerling, **William S. Daniels**, Meng Jia, Morgan D. Bazilian. “Methane emission monitoring at multiple spatiotemporal resolutions.” *Spatial and Temporal Statistics Symposium (STSS)*, (2021).

Contributed Talks

1. **William S. Daniels**, Rebecca R. Buchholz, Helen M. Worden, Fatimah Ahamad, Dorit M. Hammerling. “Interpretable model captures complex relationship between climate variability and fire season intensity in Maritime Southeast Asia.” *International Association of Wildland Fire - Fire and Climate Conference*, (2022).
2. **William S. Daniels**, Meng Jia, Dorit M. Hammerling, Shyla Kupis, Nasr Alkadi, Anna Scott. “Leveraging multiple continuous monitoring sensors for emissions alerting on oil and gas facilities.” *AGU Fall Meeting*, (2021).
3. **William S. Daniels**, Rebecca R. Buchholz, Helen M. Worden, Fatimah Ahamad, Dorit M. Hammerling. “Predicting fire season intensity in Maritime Southeast Asia with interpretable models.” *American Statistical Association CO/WY Fall Meeting*, (2021).
4. **William S. Daniels**, Fatimah Ahamad, Rebecca R. Buchholz, Dorit M. Hammerling, Helen M. Worden. “Using atmospheric carbon monoxide models to predict fire season intensity.” *Spatial and Temporal Statistics Symposium (STSS)*, (2021).
5. Meera Duggal, **William S. Daniels**, Dorit M. Hammerling. “Optimizing genetic algorithm parameters for atmospheric carbon monoxide modeling.” *Electronic Undergraduate Statistics Research Conference (eUSR)*, (2020).
6. **William S. Daniels**, Rebecca R. Buchholz, Dorit M. Hammerling. “Using the climate to model atmospheric carbon monoxide.” *Mines Graduate Research and Discovery Symposium (GRADS)*, 8th Annual, (2020).
 - **Received best talk award in Environmental Science session.**
7. **William S. Daniels**, Kevin-Druis Merenda, Lawrence Wiencke. “What can elves tell us about very strong lightning?” *APS April Meeting*, Volume 64, Number 3, (2019).
 - **Received outstanding presentation award.**

Posters

1. Zi Li, **William S. Daniels**, Dorit M. Hammerling. “Seasonal and hourly variability of particulate matter 2.5 in Denver.” *Mines Undergraduate Research Symposium*, (2022).
2. Meng Jia, **William S. Daniels**, Amber Rexwinkle, Dorit M. Hammerling. “Data-driven detection of methane leaks from oil and gas.” *Mines Applied Mathematics and Statistics (AMS) Open House*, (2022).
3. **William S. Daniels**, Dorit M. Hammerling, Rebecca R. Buchholz, Helen M. Worden, Fatimah Ahamad. “Using climate mode indices to forecast carbon monoxide variability in fire-prone Southern Hemisphere regions.” *International Global Atmospheric Chemistry (IGAC) Scientific Conference - Southern Hemispheres Session*, (2021).
 - **Poster was Highly Commended in Southern Hemisphere Working Group.**
4. Dorit M. Hammerling, Lewis Blake, **William S. Daniels**, Aidan Dykstal, Sean Crowell. “Student-led investigation of TROPOMI data for the US.” *EGU General Assembly*, (2020).
5. Meera Duggal, **William S. Daniels**, Dorit M. Hammerling. “Genetic algorithm optimization study for atmospheric carbon monoxide models.” *Mines Undergraduate Research Symposium*, (2020).

6. **William S. Daniels**, Rebecca R. Buchholz, Dorit M. Hammerling. “Improving atmospheric carbon monoxide models.” *Mines Applied Mathematics and Statistics (AMS) Open House*, (2019).
7. **William S. Daniels**, Kevin-Druis Merenda, Lawrence Wiencke. “What can elves tell us about very strong lightning?” *Mines Physics Undergraduate Research Symposium*, (2019).
· 1st place in poster competition.
8. **William S. Daniels**, Ruoshui Ma, Xiao Zhang. “Characterization of molecular structure and interlinkage network for seven representative biorefinery lignin.” *NARA SURE Research Symposium*, (2016).

Teaching Experience

TEAM-UP Teaching Program

Fall 2017

Introduction to Field Based Experience

- Worked as a teaching assistant in a high school chemistry class.
- Gave short lectures, assisted during labs, and participated in lesson planning.
- Took an accompanying education course, where we discussed education psychology, modern STEM education, and our teaching experience.

TA Positions

- Colorado School of Mines, MATH 482: Statistics Practicum Spring 2022
- Colorado School of Mines, MATH 482: Statistics Practicum Spring 2021
- Colorado School of Mines, MATH 482: Statistics Practicum Spring 2020
- Colorado School of Mines, PHGN 300: Modern Physics Fall 2017
- Arvada West High School, Honors Chemistry Fall 2017

Funding, Honors, Awards

Fellowships	Harvey Graduate Fellowship	2019 - 2021
	Mines Undergraduate Research Fellowship	2017 - 2018
	Harvey Undergraduate Scholarship	2015 - 2019
Awards	Highly Commended poster, IGAC Science Conference	2021
	Best Talk in Environmental Science Session, Mines GRADS	2020
	Mines Physics Department Distinguished Graduate	2019
	Outstanding Presentation Award, APS April Meeting	2019
	1 st Place Poster, Mines Physics Research Symposium	2019
	General Chemistry Student of the Year	2016
